

Featured Event: Gardening in a Changing Climate

Tuesday, November 21 • 6pm

Join us for a presentation that explores the science of climate change and its ramifications for our daily lives. Gardeners are all too familiar with the effects of climate change – from late frosts and earlier planting times to heavier rains and prolonged droughts. Michael Koutelis, a Master Gardener with over 30 years of experience in the energy and environmental sector, will lead this workshop aimed at reducing the effects of climate change on our gardens. Learn how to adapt your gardening strategies and practices to mitigate your impact on the environment while still enjoying the plants you love.
